03

Example #4:

A referral is received alleging sexual abuse to a ten-year old by a thirteen-year old and a twelve-year old. Upon assessment, it is found that sexual abuse to the ten-year old by the thirteen-year old did occur. Sexual abuse to the ten-year old by the twelve-year old did not occur, however it was found that mutual sexual activity occurred between the ten-old and the twelve-year old. *Remember, because these children are not from the same family unit, a separate CFS-40 must be completed for each child alleged and/or found to have been abused/neglected
